

CYMDEITHAS GWARTHEG DUON CYMREIG
WELSH BLACK CATTLE SOCIETY

CATALOGUE

OF THE 56TH ANNUAL AUTUMN SHOW AND SALE

Sponsored by the Welsh Black Cattle Society

of 35 Attested and Fully Accredited Welsh Black Females
accepted for entry in the Herd Book,
grading-up Appendix or Polled Register

Comprising: 34 Females (including 18 Maiden Heifers)
and 1 Bull

To be held at

DOLGELLAU, GWYNEDD
TUESDAY, 21ST NOVEMBER 2017

Judging: 10.45 a.m.

Sale: 12.00 noon

FEMALE OF THE YEAR 2017 – GWARCWM EIRLIW 20th 160281 Vol. 98.

Auctioneers:

Farmers Marts (R.G. Jones) Ltd, Llys Meirion, Dolgellau, Gwynedd

Tel: 01341 422334

JUDGES Bulls and Females

Official Judge: Mr. Huw Pierce Roberts, Gyrn, Llanuwchllyn, Bala, Gwynedd
Assistant Judge: Mr. Wil Jones, Maes y Pandy, Tallyllyn, Tywyn, Gwynedd

CLASSIFICATION AND JUDGES AWARDS

Class No	Description	1st	2nd	3rd
FEMALES				
1.	Females born on or before 30-4-15 9 Entries (nos 1-9)			
2.	Females born on or after 1-5-15 7 Entries (nos 10-16)			
CHAMPION FEMALE 1st and 2nd Prize Winner only eligible to compete. 1st Prize Winners only in the ring until the Champion has been selected. 2nd Prize Winner in that Class then eligible to compete for the Reserve Champion				
MAIDEN HEIFERS				
3.	Females born on or before 31-12-15 8 Entries (nos 17-24)			
4.	Females born on or between 1-3-16 and 31-7-16 6 Entries (nos 25-31)			
5.	Females born on or after 1-2-17 4 Entries (nos 31-34)			
CHAMPION MAIDEN HEIFER. 1st and 2nd Prize Winner only eligible to compete. 1st Prize Winners only in the ring until the Champion has been selected. 2nd Prize Winner in that Class then eligible to compete for the Reserve Champion.				
BULL				
6.	Bull born on or before 31-6-12 1 Entry (no 35)			
CHAMPION BULL 1st and 2nd Prize Winner only eligible to compete. 1st Prize Winners only in the ring until the Champion has been selected. 2nd Prize Winner in that Class then eligible to compete for the Reserve Champion.				

CHAMPIONSHIP PRIZES

CHAMPION BULL – The ‘Rhydygarnedd’ Challenge Cup. Presented in memory of the Late H.O. Tudor Esq. To be won three times.

Sale kindly sponsored by: NFU Mutual, Streamline Caterers, HSBC Bank, Williams Vets Tywyn,

The prize money won will not be paid to the Exhibitor if the exhibits are not sold by auction at the Sale.

NOTICE

***All Cattle are sold in accordance with the Welsh Black Cattle Society's Auction Sale Rules (copy available in Auctioneers' Office) and the conditions of Sale for Dairy Store and Beef Breeding Cattle at Markets published by the Livestock Auctioneers' Market Committee for England and Wales. In the event of discrepancy of Welsh Black Cattle Society's Auction Sale Rules shall prevail.**

CATALOGUE ABBREVIATIONS (Printed after the Herd Book number)

GRADING-UP APPENDIX

- F. – A Foundation Dam of unknown breeding and is registered in the grading-Up Appendix. No bull calves born to the female can be registered, but her heifer calves can be registered as First Grade Dams in the Grading-Up Appendix.
- F.G. – A First Grade Dam and registered in the grading-Up Appendix. No bull calves born to the female can be registered, but her heifer calves can be registered as Second Grade Dams in the Grading-Up Appendix.
- S.G. – A Second Grade Dam and registered in the grading-Up Appendix. No bull calves born to the female can be registered, but her heifer calves can be registered as full pedigree in the Herd Book.

POLLED REGISTER

Females

Polled Calves born to polled females can be entered in the Polled Register of the Herd Book.

- P.F.G. – A Polled First Grade Dam, naturally polled and by either a pedigree horned Welsh Black Bull and a registered polled dam or by a registered polled Welsh Black Bull and out of any registered horned Welsh Black Female.
- P.S.G. – A Polled Second Grade Dam, Naturally polled out of a Polled First Grade Dam and a registered polled Welsh Black Bull.
- P.T.G. - A Polled Third Grade Dam naturally polled with no vestige of horns or scurs out of a polled Second Grade Dam by a 'Proven' Polled Welsh Black Bull.
- P.G. - A Polled Graduate Dam, naturally polled with no vestige of horns or curs out of a Polled Third Grade Dam by a 'Proven' polled Welsh Black Bull.
- H.F.G. – Horned heifer calves born to any grade of polled dams, or by polled sires may be accepted as Second Grade Dams in Grading-Up Appendix.

New Polled Ruling

- (PP) – Pure Polled
- (IP) – Impure Polled
- (UP) – Unidentified Polled
- (HP) – Horned Polled

Copies of the Rules relating to the Polled Register are available from the Secretary or from the Auctioneers.

(A.I.) – ARTIFICIAL INSEMINATION. Denotes bull which have been used for Artificial Insemination by any of the Cattle Breeding Companies.

BREEDING GUARANTEES

(a) All cows and heifers which are stated in the catalogue as having been served, or inseminated, not less than twelve weeks before the date of the Sale, or stated as having been running with a bull between dates (the Latter of which is not less than twelve week before the date of the Sale) will be guaranteed to be in-calf to the service date, the date of insemination, or between dates and to the bull stated in the catalogue, unless alteration is announced at the time of Sale. In the event of any breach of warranty the purchaser must notify the auctioneers in writing, within the time prescribed in the auctioneer's sale rules, which in the case of cows and heifers proving not to be in-calf is 43 days.

All females served, inseminated, or running with the bull less than twelve (12) weeks from the date of Sale shall be described in the Catalogue as not being guaranteed in-calf.

FREEDOM FROM DISEASE

- 1) Vendors must declare their herd's risk level for Johne's disease.
- 2) Herds are classified for Johne's disease as:
 - Risk level 1 – Herds have had at least 3 clear annual herd tests.
 - Risk level 2 – Herds that have had one or two clear annual herd tests.
 - Risk level 3 – Herds that have had less than 3% reactors in their last herd test.
 - Risk level 4 – Herds that have had more than 3% reactors in their last herd test.
 - Risk level 5 – Herds that are either not testing for Johne's disease in an approved health scheme, or are not complying with the rules of such a scheme.
- 3) Members of a licensed cattle health scheme for Johne's disease are required to isolate and test animals purchased from herds at all risk levels other than risk level 1
- 4) A purchaser wishing to take advantage of section 22 of the Society's auction sale rules – purchaser's rights in relation to vendor's warranty for Johne's disease and BVD – should ensure that samples are taken from cattle either prior to leaving the sale ground or within one week of the sale provided they are kept in appropriate isolation during that time.

BULL FERTILITY TESTING

The fertility examination should ideally be done within one month of the sale. Purchasers should note that the veterinary certificate relates to the fertility of the bull on the day of examination. If the interval between the examination and the sale is longer than one month, then the possibility that something could have adversely affected the fertility since the day of the examination is increased.

The veterinary certificate should be made available for inspection at the sale and the purchaser should be supplied with a copy.

UNDERSTANDING THE BREEDPLAN PERFORMANCE RECORDING INFORMATION IN THIS CATALOGUE

Only Welsh Black GROUP BREEDPLAN EBVs or INTERIM EBVs with Accuracy (Acc) can be validly compared between herds.

ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Accuracy below 75% should be considered low.

CALVING EASE

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

DIR: Direct calving ease indicates how this animal influences the birth of its progeny.

DTRS: Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

BIRTH AND FERTILITY

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

GROWTH

MILK: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

CARCASE

CWT: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

FAT: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

The Welsh Black GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Welsh Black Cattle Society nor the ABRI oversee or audit the collection of this data.

(Accredited to Risk Level 2)		

Total		35

Note Organic Herd

Note: Health declarations are correct at time of going to print. All health declarations should be supported by an up to date pen card at the sale. In the time period between going to print and the sale, the health status of some herds can change and this will be reflected in the pen card details which give an accurate statement of the health status at the time of sale.
